Laser Marking + Engraving Solutions

FOBA C-Series

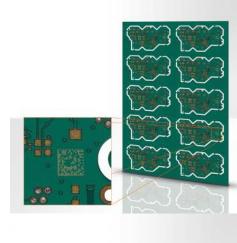

Versatile, powerful and reliable all-rounders for laser etching

CO2 lasers have established themselves as a versatile, reliable and cost-effective solution for industrial direct parts marking. These lasers are especially suitable for applications requiring wavelengths between 9.3 and 10.6 μ m.

Classic applications include the marking of plastics and organic materials for traceability, brand protection or decoration in the consumer goods, automotive and electronics industries. In addition to non-metallic materials, ranging from plastics and resins to glass, ceramics, wood, paper and cardboard, gas laser etchers also provide particularly cost effective marks on painted metals and anodized aluminum.

With 10 (C.0102), 30 (C.0302) and powerful 60 (C.0602) watts of laser output power, FOBA's C-Series offers the widest range of CO2 marking lasers on the market that are ideally suited for a wide variety of applications – especially for those with high line speed requirements.

Flexibility is an integral part of the C-Series: **Wavelength, scan head aperture, marking head position, IP rating, laser power and many other parameters can be configured** to meet the specific requirements. With **marking speeds of up to 2,100 characters per second** and **line speeds of up to 900 meters per minute,** FOBA's CO2 marking lasers are perfect for the **efficient application of simple to complex content** – both stationary and in motion (markon-the-fly).

PCB: material removal Roll-over valve: plastic engraving Connector: engraving/color change

Your benefits:

Fast, high-quality and economical marking

With the C-Series, FOBA offers reliable laser marking systems that have proven themselves in countless industrial applications. Thanks to continuous development and adaptation to market trends, the C-Series offers one of the widest ranges of variants in terms of laser parameters and wavelengths.

Reliability:

- → Air-cooled lasers virtually eliminate maintenance intervals.
- → High resolution marking heads for high quality, permanent and consistently crisp codes ...
- → that assure product traceability and tamper-proofing.

Built-in productivity:

→ A variety of mark window options and high-speed marking heads allow for a throughput increase of up to 67%.

Simple usability:

- → Most flexible integration solution with 32 standard beam delivery options.
- → Quick set up and easy redeployment via detachable umbilical cable and simple-to-use accessory connections.
- → 4 interface options plus a choice of networking communications to match the preferred workflow.

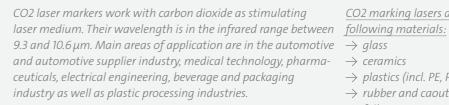

Available wavelengths: 9.3/10.2/10.6 µm Available IP ratings: IP54/IP65 (optional)

Step on the gas for more efficiency:

CO₂ laser basics

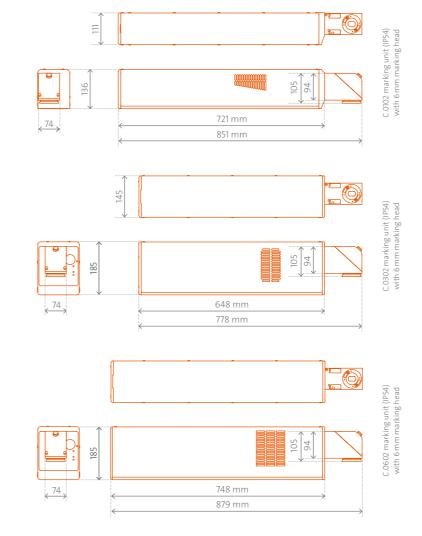

Carbon dioxide lasers mark reliably, efficiently and economically. \rightarrow organic materials (wood, paper, cardboard, leather, food) They are extremely powerful and have proven themselves in many years of industrial use, especially due to their high costeffectiveness.

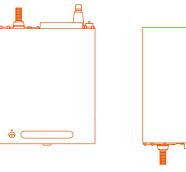

CO2 marking lasers are ideal for the processing of the

- \rightarrow plastics (incl. PE, PP, PET, PVC)
- \rightarrow rubber and caoutchouc
- \rightarrow foils
- \rightarrow painted metals
- \rightarrow anodized Aluminum

Marking features

Marking heads and focusing

ightarrow 6 mm head with 5 focus lenses (f=64/95/127/190/254 mm)

 \rightarrow 10/12/15mm heads (optional) with various focus lenses (10/12 mm: f=63.5/85/100/150/200/300/351/400 mm, 15 mm: f=100/150/200/300/351/400/500/600 mm)

Marking fields (mm²)

 \rightarrow 6 mm head: from (AxB) 44.7 x 44.7 to 177.3 x 177.3 \rightarrow 10 mm head: from (AxB) 30.8 x 38.2 to 294.7 x 406.9

 \rightarrow 12 mm head: from (AxB) 29.1x36.2 to 294.7x350.8

 \rightarrow 15 mm head: from (AxB) 66.7 x 100.1 to 439.8 x 601.0

Laser

Type Sealed CO2 laser, power classes 10/30/60 Watt, Wavelengths 9.3/10.2 and 10.6 µm

Laser class 4 (acc. to IEC 60825-1)

User interfaces

Handheld controller

PC softwareFOBA Draw, MarkUSSmart Graph ComActive X interface

Interfaces Ethernet (TCP/IP), RS232 optional; Inputs for encoders and product detector triggers; I/Os

for start/stop, machine/operator interlocks, alarm outputs; additional I/Os available

Integration

Machine safety Optional safety module for Performance Level d (PL d) in accordance with EN 13849-1

Line integration Direct integration via scripting interface

Beam delivery32 standard beam delivery options (beam extension unit/turning unit) **Quick connect**Detachable umbilical for simple integration; available in 3 lengths

Supply

Electrical req. L/N/PE 100 – 240 VAC, 50/60 Hz

Power consumption C.0102: max. 0.4 kW, C.0302: max. 0.7 kW, C.0602: max. 1.15 kW

 $\textbf{IP rating} \qquad \qquad \rightarrow \text{Marking unit: IP54 (optional IP65)} \rightarrow \text{Supply unit: IP54 (optional IP65)}$

Cooling Air-cooled

Temp./Humidity 5-40 °C /10-90 %, non-condensing Weight \rightarrow Marking unit C.0102 (IP54) $^{\sim}$ 13 kg

→ Marking unit C.0302 (IP54) ~19 kg → Marking unit C.0602 (IP54) ~27kg
